Fund Review

US equities advanced in July, with the S&P 500 Index touching its highest level since January 2022 in the closing days of the month. Shares were boosted by hopes of a soft landing given a further fall in the US headline inflation rate, as well as data underlining the continued resilience of the US economy. The start of the earnings season was generally positive, albeit news at a company level was mixed. US bonds were mixed over July. Treasury bonds sold off as stronger-than-expected data caused the 10-year to retest 4.0%, a level last seen in March. Nevertheless, yields remained volatile, falling on weaker-than-expected inflation and job data before rising once more towards month end. Overall, the inversion of the yield curve became less extreme as yields on longer dated maturities rose more than those on shorter dated ones.

Fund Performance

The fund's net asset value increased 3.19% from last month.

The assets of Global Growth Fund are invested exclusively into the Allianz Choice Balanced Fund of the Allianz Global Investors Choice Fund.
